AGENDA ITEM	DISCUSSIONS/OUTCOMES	
Call to Order	Time : 2:00 p.m.	
Celebrations / Recognitions / News	 After the Town Hall was held last Monday, April 18, three additional employees announced their retirements: Linda Covert, Joyce Buckner, and Joan Warren. Kim Harvey-Manus announced that Stephanie Cage and Laura Richardson were presented with a Proclamation at the Jefferson County Council meeting last night in honor of Child Care Provider Day. The Jefferson College Child Development Center was the only child care center in the County to receive a Proclamation recognizing their hard work. Congratulations to both Stephanie and Laura. Carrie Greer and Suzie Welch shared feedback from the College's Preview Day (held on Saturday, March 5): Thirty-two students completed the survey. 90% rated Preview Day very highly. 81% indicated they found the presentations helpful. 56% preferred the academic program and resource table as the most helpful of the event. A lot of positive feedback was received from attendees. Dena again thanked Carrie and Suzie for the phenomenal job they did in spear-heading the event. It was also wonderful to see so many employee volunteers participating in the event. Chris DeGeare announced: The Law Enforcement Academy held their Graduation Ceremony on April 20, and the recruits once again had 100% pass rate on the POST exam. Congratulations to the students and instructors alike. 	

Pet Policy Update	 The Automotive Technology program recently completed and was successfully re-accredited for five years with the Automotive Service Excellence (ASE). This is great for the Automotive program. Congratulations to Maryanne Angliongto, Gerard Uhls, and Brad Berrey. Prior to the meeting, this update was removed from the agenda for discussion. Dena thanked Emily West and the Pet Policy Task Force for working on this initiative. What was discovered during the process of developing a policy is that it is much more controversial than was anticipated. The Task Force recently received another round of significant feedback that needs to be reviewed; therefore, the Administration has decided to give the Task Force more time to review this feedback and decide how best to move forward. For now, the College will remain "status quo." Since we are near the end of the semester and the academic year, Dena expects updates in August or September.
Predictive Model for Student Retention	 everyone is comfortable with animals as indicated in some feedback received. Jude Kyoore shared the following regarding retention and persistence: The IR team uses definitions and trends from the NCCBP (National Community College Benchmarking Project) to be consistent with data reported. They are also able to compare Jefferson College data with other institutions using the NCCBP information. Fall to spring persistence data was shared for ten years. Persistence for Spring 2022 is 76.9%, the highest retention percentage rate in the last ten years. Retention of degree-seeking students is also at the highest retention rate in ten years. Jude congratulated all who are involved with retaining students and the good results the College is experiencing.
	 <u>Predictive Model for Student Retention</u>: Jude discussed why retention is important and how it affects the College. Two questions the IR team want to be able to answer: What factors predict whether a student who enrolls in the fall returns in the spring (next term persistence); and, What factors predict whether a student who enrolls in the fall returns the next fall (next fall persistence). Many demographic and academic variables affect student persistence. Data reviewed included: High school persistence for the past ten years (as well as predictions for the coming years). Descriptive statistics (including outcome variables, numerical variables, and categorical variables). The methodology was shared. Accuracy of the data was tested by the IR staff based on actual outcomes. Jude shared that while the Predictive Analysis presents important key information that can potentially increase persistence, it must complement other efforts. The IR staff hope to implement the Model for Fall 2022.

June. The construction will likely continue throughout the summer.HLC Conference Updates & Assurance ReviewKim Harvey-Manus reported the following regarding the upcoming Assurance Review: • The College is in Year Four of the Open Pathway Model for re-accreditation. The Year Four Assurance Review is not a comprehensive evaluation, there is no on-site visit, there is no federal compliance review, and there is no student opinion survey. • A Peer Review Team will review the College's updated Assurance Argument and evidence. • The College needs to be addressing any recommendations from 2019. • The Assurance Argument must be completed and "locked" no later than June 5, 2023. • The Peer Review Team will then have 30 days to review our Assurance Argument and provide feedback.
